CERTIFICATIONS

MTA Database Administration
Fundamentals | 2017
Coursera Data Science
Math Skills | 2017

COURSEWORK

UNDERGRADUATE

Database Management
Software Development
Project Management
Operating Systems
Cloud Programming

INDEPENDENT

Data Science Math Skills
Neural Networks and Deep Learning

SKILLS

LANGUAGES

5+ Years:

Java • Python

3-5 Years:

SQL • JavaScript

0-2 Years:

C# • C++ • PHP

TECHNOLOGIES

ASP.NET MVC

ReactJS

Node.js

Android

Git

EXPERIENCE

WILLIS TOWERS WATSON | SOFTWARE DEVELOPER INTERN

May 2017 – Dec 2017 (8 Months) | Taguig, PH

- Developed, performed unit tests, and pushed into production several UI enhancements for a financial web application.
- Rebuilt, debugged, and released into production an optimized Workforce Management System (WinForms).
- Added a reporting tool and extended the logging parameters to accommodate users of different shifts for the workforce management system.
- Worked on 3 projects: a workforce management system (desktop and web app) and 2 financial web applications.
- Learned Agile (Scrum), SOLID Principles, and IOC for dev tasks.
- Updated 3 user manuals for user acceptance testing.

PROJECTS

RSY FITNESS GYM | DEVELOPMENT

Website - C#, ASP.NET, Microsoft Azure

In a group of five, worked in the development of a website for RSY Fitness Gym where users can register or login accounts, view classes, and buy merchandise.

CHATTRGLASS | DEVELOPMENT

Website - JavaScript, Express.js, Node.js

A platform that enforces better collaboration between teams by allowing users to connect, create, and participate in chat groups in realtime and a focused newsfeed.

JOBSETH | DEVELOPMENT

Blockchain Web App - JavaScript, Solidity, web3.js

A simple platform for posting job ads utilising the ethereum stack.

MEDQA | RESEARCH, DEVELOPMENT

Natural Language Processing - Java, PHP, SQL, Elasticsearch, CoreNLP

Led a group of three to research and develop a console-based and web-based applications that reads and answers a user's question about diabetes using Natural Language Processing.

EVALUATING MACHINE LEARNING ALGORITHMS FOR EMPLOYEE ATTRITION FORECASTING | RESEARCH, DEVELOPMENT

Undergrad Thesis - Python, Tensorflow, Clementine

Led a group of five to research, develop, and evaluate the efficiency of an intelligent human resources analytic system for analysing Employee Turnovers using neural networks.

SM AUGMENTED REALITY APPLICATION | PROJECT MANAGEMENT

Android Application - Java, PHP, C#, Vuforia SDK

Tasked by the SM Hotels & Conventions Center and led a group to develop a mobile application utilising augmented reality to provide an interactive tour for its branches.
